

COMPANY PROFILE

AR Concrete

AR Ready Mix (AR) is a Chennai based firm proposing to engage in the manufacture and marketing of Ready Mix Concrete (RMC). RMC is defined as concrete manufactured as per specifications of the customer, at a centrally located batching plant and delivered to the construction site in truck mixers capable of mixing the ingredients of the concrete enroot or just before delivery of the batch.

We would like to introduce ourselves that we are the manufactures of Ready-mix concrete in the name of "AR Ready Mix ", which has a base of 5 plants located in and around Chennai. We would like to highlight few points about our organization, please find it in the below:

We have ISO certified RMC plant in Kovur (CP 30 Plant)/ Medavakkam (H1J1 plant 60M³ /Per Hr) .

We are the approved Registered RMC company With Corporation of Chennai.

We have our own exclusive RMC unit in Chemmencherry for Tamil Nadu slum Clearence Board. (Government Approved RMC supplier)

We have got approval for RMC supply to Port trust, Chennai metro ,Southern Railways, Housing board and TNEB

We are the RMC supplier for most of the major key customer in Chennai. We have mentioned it our client base in the profile.

AR's BackBone – The Professionals

AR operations will be headed by Mr. K. Ramesh, partner who has been in the concrete industry since 2004. He started his career with ACE Concrete as Business and Operations manager. He has also worked with ACC for 3 years as ALPM (Area Logistics & Procurement Manager for the Tamil Nadu region. His strength lies in his extensive

knowledge of logistics and procurement apart from RMC plant operations. He is a Civil Engineer with over 20 years of experience and extensive understanding of the Chennai market.

The Details of our Plant location and customer base were given below:

Plant 1:

Our Commercial Plant is located at Kovur which is CP30 Model Plant, sharing the compound with Ultra Tech Plant and adjacent to SRM Plant. We are currently supplying concrete from our commercial plant to locations all over Chennai. We also have a centralized quality control laboratory is located at Kovur plant.

Mission of AR

*To be the most respected and attractive company in the industry
creating value for all our*

Stakeholders

Advantage of AR concrete

Our AR Concrete team ensures safe working at customer's site by adopting best industry practices. The most advanced tracking systems and a dedicated central dispatch teams ensure timely delivery of concrete to our customers. The structural strength of the concrete is easy to appreciate. But what isn't so visible, without cutting through a core sample is the make-up of the concrete itself and the aggregates that supply its crucial inner strength.

Convenience

For our many business clients, time is money. So, as a company, we put a lot of emphasis on making ourselves as easy as possible to deal with. Our modern fleet of Transit mixers offer a convenient and cost effective method of supplying ready mixed concrete to commercial, industrial and residential projects.

Concrete pumps can place ready mixed concrete exactly where it is required. This option is especially useful where AR is difficult or large quantities are required. In addition to conventional concrete, it's possible to create a range of interesting decorative textures and finishes to heighten the visual impact of finished product.

Customer Concern

We operate computerized batching technology to ensure consistent performance in the production of ready mixed concrete to customer specifications. Our centrally located computerized dispatching system

**NO 45/1, PERIYA PANICHERRY, KUNDRATHUR,
PANCHAYAT UNION, KOVUR,
CHENNAI 600 122
arreadymix@gmail.com**

provides customers with a convenient means of ordering their ready mixed concrete requirements wherever they are located

Pumping

AR Concrete can arrange pumping services through reliable Business Partners. Pumping can be a cost-efficient solution for projects where volumes are large or access is difficult, such as interior work, multistory buildings, bridges, back sections, or wet and swampy areas.

Placing

Having delivered concrete on site, we recognize that the appearance and some quality aspects of the finished product will be in the hands of the concrete placers. AR Concrete acknowledges the key role that placers have in this respect and has technical and sales staff available to recommend the best means of achieving a quality outcome.

arreadymix@gmail.com**

Versatility

AR Concrete has a recognized ability to effectively manage concrete projects ranging from smaller residential projects through to complex mass pours.

Service

AR Concrete customers have to come to expect a high level of service from our staff that not only understand the business of concrete but are willing to go the extra distance to create a satisfied customer.

Technical Solution

AR Concrete operates a fully equipped laboratory. The laboratory not only checks the consistency of raw materials and mix designs, it also plays a key role in new product development. Where projects call for specialized technical assistance, we have technical staff available to assist with solutions.

arreadymix@gmail.com**

Proven Reliability

AR Concrete has been at the forefront of the ready mixed concrete business since the early 2012 as our customers can rely on our ability to consistently deliver quality product to tight delivery schedules, we have learned the importance of doing the simple things well. This is reflected in the strength of our quality assurance processes and our attention to detail.

Support

AR Concrete has a comprehensive database of cases on effective solutions related to concrete. Our customer service can support you on information about Work ability, placing, compacting and curing, cracking control, uneven s
